## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel R. Pastririk on November 13, 2003.

The application has been amended as follows:

Claim 1, line 5, delete ", the thickening agent comprising a polymer of " and insert therefor having a --.

Claim 15, line 18, after "acrylic acid monomer" insert -- having a molecular weight between about 200,000 and about 800,000--.

Claim 15, lines 19-20, delete ", wherein the thickening agent ... 800,000".

Claim 17, line 5, delete ", wherein the thickening agent comprises a polymer or copolymer of " and insert therefor -- having a --.

The following is an examiner's statement of reasons for allowance:

It is agreed that the prior art of record does not teach employing a thickening agent comprising a (co)polymer of acrylic acid having a molecular weight between about 200,000 and about 800,000, as defined in instant claim 1.

The following references teach acrylic acid copolymers as thickening agents but do not teach the instantly recited molecular weight or aqueous microemulsions of hydrophobic and hydrophilic and/or amphiphilic monomers. Koenig et al (4,268,641), DeTommaso (3,894,980), Coughlan et al (4,564,010), Sonnabend (4,384,096), Cooprider et al (5,571,617) and Sanderson et al (4,145,465).
